Constant Flow Syringe Pump

Constinfuse[®] Constant Flow Syringe Pump

Model No.

CFSP- I

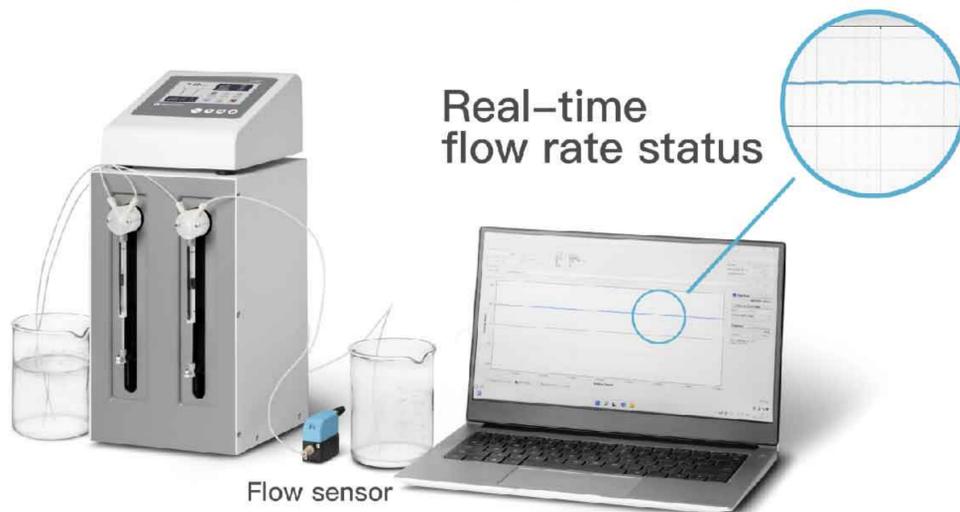

Introduction

Constinfuse[®] constant flow syringe pump, focusing on microliter volume liquids continuous transferring and dispensing. Flow rate range: 0.06uL~70mL/min, continuous flow. Support RS232 and RS485 communication for external control.

Features

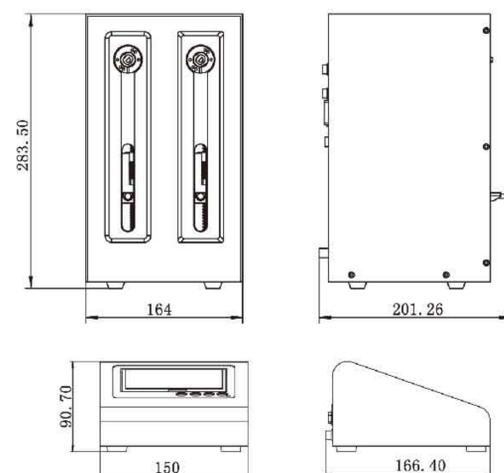

- | High precision and uninterrupted transferring of micro-liter liquids.
- | Four working modes: Continuous transferring; Fixed volume measurement; Dispensing; Timing start/stop.
- | 4.3-inch industrial-grade true color LCD screen display, friendly operation interface and synchronous simulation animation, allowing users to operate conveniently.
- | Multiple external control interfaces to meet various supporting needs.
- | Record the number of times the valve and syringe are used, which is convenient for equipment maintenance.
- | The pump unit supports "offline" operation, which enables one controller to set different parameters for pump units, which is convenient for users to use together with other equipments.
- | The controller has offline reminder and parameter synchronization function. Intelligent calibration function.
- | Closed-loop control, overload protection function, effectively protect the syringe.
- | Quiet design. 304 stainless steel spray shell.

Constant Flow Curve

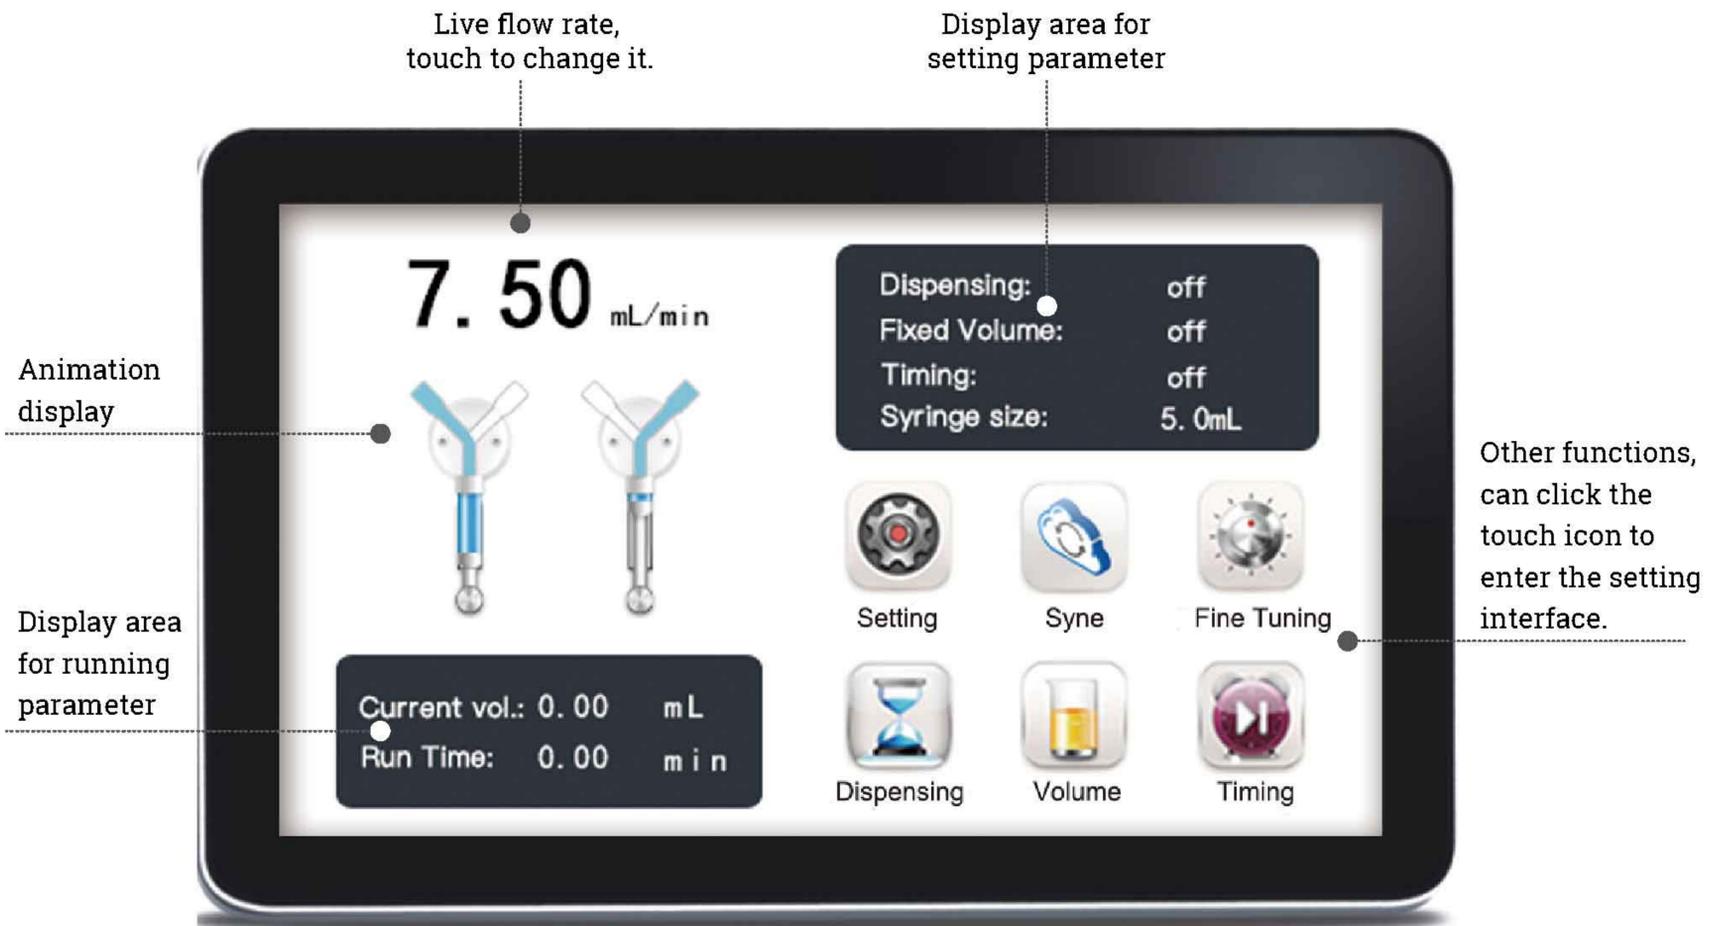

Note: 1mL syringe, 1000uL/min

Dimension Drawing (Unit: mm)

Constant Flow Syringe Pump

Interface Display

Technical Specifications

Flow rate	0.06 μ L/min-70mL/min (Pure water, and the length of the tube at the liquid inlet is less than 1 meter, and the inner diameter is 1.6mm)	Maximum pressure of liquid path	0.68MPa(High pressure above 0.68MPa, please contact us)
		Valve material	Valve body: PCTFE Valve element: PTFE
Dispensing volume range	0.1 μ L-25mL	Valve type	3 port valve
		Tube connection interface	1/4-28UNF
Accuracy	$\leq \pm 0.05\%$ (Maximum stroke, 500 μ L or more syringe, pure water at room temperature)	Syringe size	50 μ L, 100 μ L, 250 μ L, 500 μ L, 1.0mL, 2.5 mL, 5.0 mL, 10 mL, 25 mL
Communication	RS232 and RS485, support Modbus protocol, RTU mode	Syringe material	Barrel material: Borosilicate glass Plunger rod material: Stainless steel Plunger seal material: PTFE
External control	Passive switch signal: Start/pause function. For example: Foot pedal switch; Active switch signal: Start/pause, stop, washing, initialization function 5-24V universal	Power supply	Pump unit: Standard 24V adapter Controller: Standard 5V adapter
		Power consumption	Controller ≤ 10 W, pump unit ≤ 60 W
Output	Indicates liquid output status (Open collector output)	Environment temperature	15 $^{\circ}$ C~40 $^{\circ}$ C(Low temperature operation requires a low temperature syringe)
Display	4.3 inch industrial-grade true color LCD screen	Relative humidity	<80%(RH)
Control	Touch screen and keypad		

Syringe	Mini. flow rate	Max. flow rate
50 μ L	0.0625 μ L/min	608.37 μ L/min
100 μ L	0.125 μ L/min	1.21mL/min
250 μ L	0.3125 μ L/min	3.04mL/min
500 μ L	0.625 μ L/min	6.08mL/min
1.0mL	1.25 μ L/min	12.16mL/min
2.5mL	3.125 μ L/min	30.41mL/min
5.0mL	6.25 μ L/min	60.83mL/min
10mL	12.5 μ L/min	70.00mL/min
25mL	31.25 μ L/min	55.00mL/min

Testing condition:

Outlet and inlet tube size is 3.2mm*1.6mm, Length is 1m, Liquid is pure water. Tube size, length and liquid will affect the flow rate.

Constant Flow Syringe Pump

Constinfuse® Constant Flow Syringe Pump

Model No.

CFSP-II

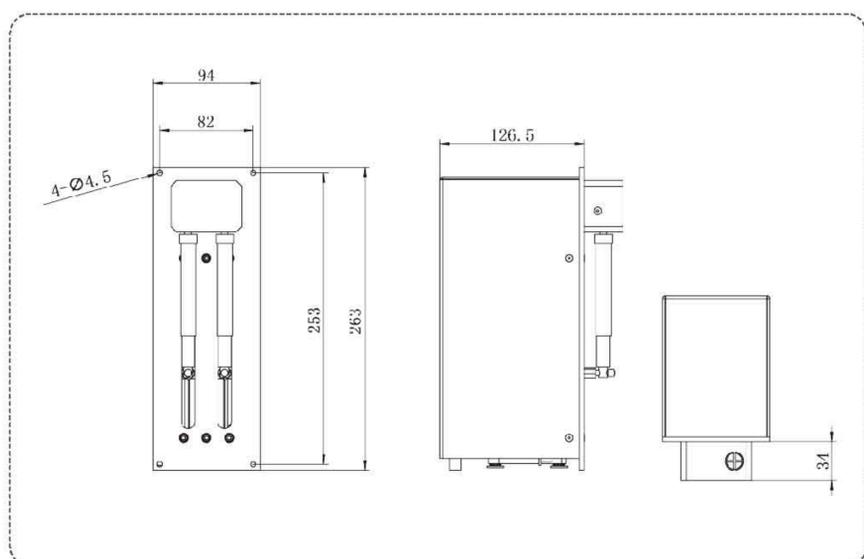

Introduction

CFSP-II constant flow syringe pump, flow rate range: 0.5uL-70mL/min, special for micro volume liquid continuous transferring or dispensing. Support RS232 and RS485 communication, also support TTL level external control interface, to achieve remote control. Compact design, special for supporting instruments.

Features

- | High accuracy and uninterrupted transferring for micro-liter fluids.
- | Three working modes: constant transferring, fixed volume measurement and dispensing.
- | Multiple external control interfaces and standard Modbus communication protocol to meet various supporting needs.
- | Record the number of times the valve and syringes used, which is convenient for equipment maintenance.
- | Closed-loop control, over-load protection function, effectively protect syringe.
- | Compact structure, convenient for matching with other equipment.

Dimension Drawing (Unit: mm)

Technical Specifications

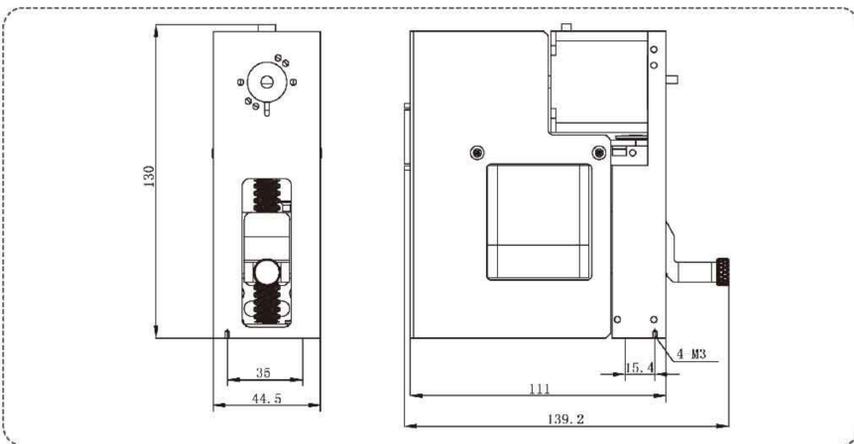

Flow rate	0.5μL/min-70mL/min (Pure water, and the length of the tube at the liquid inlet is less than 1 meter, and the inner diameter is 1.6mm)	Valve material	Valve body: PEEK, Diaphragm: FKM, Sealing ring: FKM
		Tube connection interface	1/4-28UNF
Communication interface	RS232/RS485, Modbus protocol(RTU mode)	Syringe size	50μL, 100μL, 250μL, 500μL, 1.0mL, 2.5mL, 5.0mL, 10mL, 25mL
Input	2 TTL level signal inputs, which can be configured as different external control functions	Syringe material	Barrel material: Borosilicate glass Plunger rod material: Stainless steel Plunger seal material: PTFE
Output	3 TTL level signal outputs, which can be configured as different status indications	Power supply	DC24V±10%/2.5A(Peak value)
		Power consumption	≤60W
Maximum pressure of liquid path	0.2MPa	Environment temperature	15°C~40°C(Low temperature operation requires a low temperature syringe)
Valves type	Electromagnetic valve	Relative humidity	<80% (RH)

Industrial Syringe Pump

SP30-1A

Dimension Drawing (Unit: mm)

Introduction

SP30-1A syringe pump is a programmable liquid handling pump module, rated stroke: 30mm. The pump can be controlled by external computer or microcontroller, to realize high precision liquid handling.

Features

Application flexibility:

Programmable, controlled by external computer or microcontroller, suitable for a wide range of sizes syringe and valves.

Reliable performance:

Photoelectric encoder detects out of step; controllable start speed, maximum speed and stop speed;
 Programmable acceleration and deceleration slopes;
 Can realize planned maintenance and replacement of syringes and valves.

Simple way to integrate:

Support RS232/RS485/CAN communication;
 Up to 15 sets of SP30-1A syringe pumps can be connected together;
 Two digital inputs and three outputs for TTL level signals;
 Used for synchronization with other external devices.

Technical Specifications

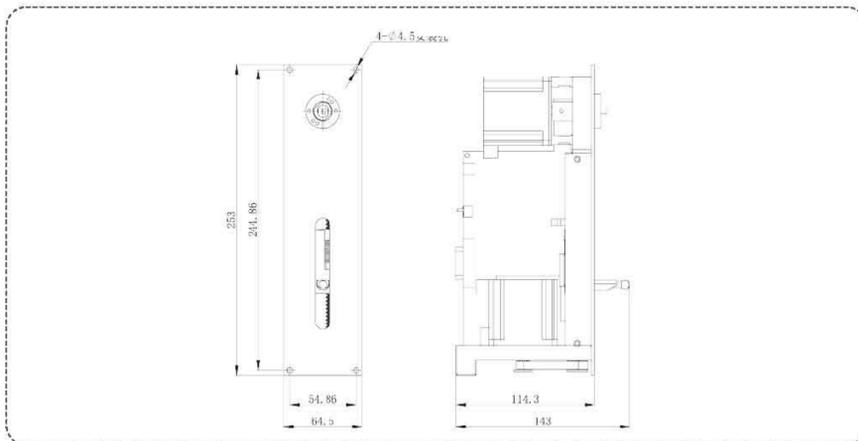

Accuracy	Error $\leq \pm 0.1\%$ (stroke $\geq 30\%$ maximum stroke)	Syringe material	Barrel material: Borosilicate glass Plunger rod material: Stainless steel Plunger seal material: PTFE
Plunger drive	Stepper motor drives ball screw, quadrature encoder detects out-of-step and returns to zero	Communication interface	RS232/RS485/CAN
Max. stroke(Steps)	30mm(3000 steps or 24000 steps)	Baud rate	9600 or 38400(RS232/RS485); 100K, 125K, 250K, 500K, 1M(CAN)
Linear speed range	0.005mm/s-30mm/s	Addressing	UP to 15 individual addresses available(BCD switch)
Run time per stroke	1.25s-100min	Input	Two TTL level signal inputs, for restart the paused instruct
Speed resolution	0.005mm/s	Output	Three TTL level signal outputs, for synchronous external devices
Stroke resolution	0.01mm or 0.00125mm	Condition temperature	15°C~40°C(Low temperature operation requires a low temperature syringe)
Valve switch time	≤ 250 ms between adjacent ports	Storage temperature	-20°C~65°C
Valves type	3 port valve, 4 port valve, 3 port distribution valve, 9 port distribution valve	Max. pressure	0.68MPa(High pressure above 0.68MPa, please contact us)
Valve material	Valve body: PCTFE Valve element: PTFE	Dimension(mm)	139.2*44.5*130 (mm)
Tubing fittings	1/4-28UNF		
Syringe fittings	1/4-28UNF		
Syringes	50 μ L, 100 μ L, 250 μ L, 500 μ L, 1.0mL, 2.5mL, 5.0mL		
Power supply	DC24V $\pm 10\%$ /1.25A		

Industrial Syringe Pump

SP60-1A

Dimension Drawing (Unit: mm)

Introduction

SP60-1A syringe pump is a programmable liquid handling pump module, rated stroke: 60mm. The pump can be controlled by external computer or microcontroller, to realize high precision liquid handling.

Features

| Application flexibility:

Programmable, controlled by external computer or microcontroller, suitable for a wide range of sizes syringe and valves.

| Reliable performance:

Photoelectric encoder detects out of step; controllable start speed, maximum speed and stop speed;
Programmable acceleration and deceleration slopes;
Can realize planned maintenance and replacement of syringes and valves.

| Simple way to integrate:

Support RS232/RS485/CAN communication;
Up to 15 sets of SP60-1A syringe pumps can be connected together;
Two digital inputs and three outputs for TTL level signals;
Used for synchronization with other external devices.

Technical Specifications

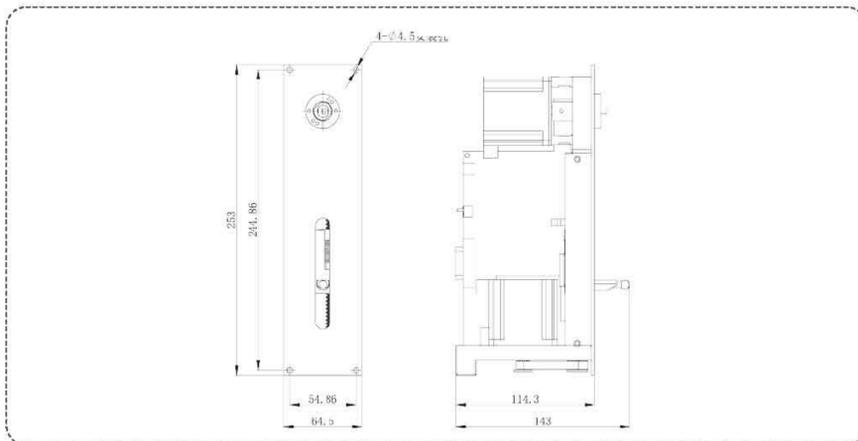

Accuracy	Error $\leq \pm 0.1\%$ (stroke $\geq 30\%$ maximum stroke)	Power supply	DC24V $\pm 10\%$ /1.25A(Peak value)
Plunger drive	Stepper motor drives ball screw, quadrature encoder detects out-of-step and returns to zero	Communication interface	RS232/RS485/CAN
Max. stroke(Steps)	60mm(6000 steps or 48000 steps)	Baud rate	9600 or 38400(RS232/RS485); 100K, 125K, 250K, 500K, 1M(CAN)
Linear speed range	0.01mm/s-60mm/s		
Run time per stroke	1.25s-100min	Addressing	UP to 15 individual addresses available(BCD switch)
Speed resolution	0.01mm/s		
Stroke resolution	0.01mm or 0.00125mm	Input	Two TTL level signal inputs, for restart the paused instruct

Industrial Syringe Pump

SP60-nB

SP60-8B

Model No.

SP60-2B, SP60-3B, SP60-4B, SP60-6B, SP60-8B

Introduction

It is a programmable, open-architecture, precision liquid handling unit, which is controlled by external computer or microprocessor to realize automatic pipetting, dilution and dispensing functions.

Features

- | Simultaneous processing multiple liquids;
- | Photoelectric encoder detects of step;
- | Controllable start speed, maximum speed and stop speed;
- | Programmable acceleration and deceleration slopes;
- | Can realize planned maintenance and replacement of syringes.

Technical Specifications

Accuracy	Error $\leq \pm 0.1\%$ (stroke $\geq 30\%$ maximum stroke)	Syringe material	Barrel material: Borosilicate glass				
Max. stroke(Steps)	60mm(6000 steps or 48000 steps)		Plunger rod material: Stainless steel				
Linear speed range	0.01mm/s-60mm/s		Plunger seal material: PTFE

Introduction

The intelligent syringe pump with infusion/withdrawal mode, stainless steel body, and 4.3" color LCD screen is easy to operate. It can install and fix different types of injectors or syringes in the same time, and it is suitable for transferring micro flow rates with high precision (non-medical).

Features

- | **Online flow rate modification function:**
Can adjust the flow rate during the pump is running.
- | **Colorful LCD display:**
Friendly interface, 4.3 inch LCD display every technical parameter in real time.
- | **Input syringe inner diameter function:**
Can choose the injector from the list or input the injector inner diameter directly.
- | **Two measurement mode for selection:**
Infusion volume-Infusion flow rate, Infusion volume-Infusion time.
- | **4 different working modes:**
Infusion, withdrawal, infusion/withdrawal, withdrawal/infusion. The parameters of each working mode saving separately. Each working mode can be changed to continuous mode by setting repeat parameters.
- | **Alarm function:**
The pump will stall and give an alarm when the drive structure of the pump is blocked.

Syringe Pump External Control Schematic

Programmable Syringe Pump

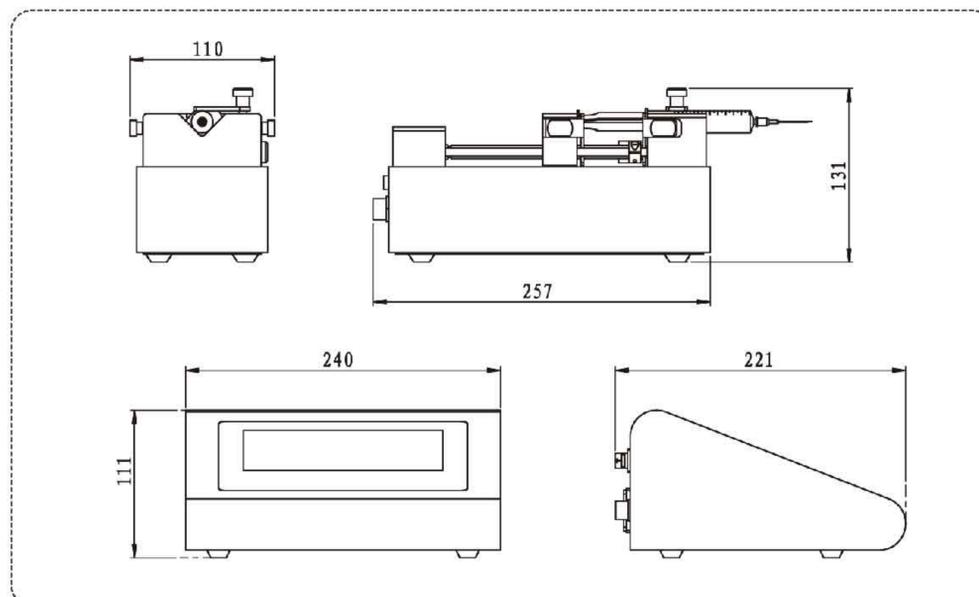

Model Number

SPC/ZU-I

Introduction

7 inch touch screen control, display 8 pump units working parameters and working state. Friendly interface, easy operation. Split type design, mainly for laboratory.

Dimension Drawing (Unit: mm)

Features

- | **Online flow rate modification function:**
Can adjust the flow rate during the pump is running.
- | Two working mode: Independent working mode, each unit working independently, can infuse or withdraw with different speed in same time or different time. Logic working mode, each unit working with time relationship, with different proportion infuse or withdraw. Users can choose each unit to be independent or logic working mode.
- | Intelligent calibration, ensure infuse volume accuracy. Online micro adjusting function, convenient to adjust the volume of one units, decrease volume error.
- | Real time monitor, animate display monitor result. Controller can receive traffic alarm of each unit.
- | Back distance setting, can exclude bubbles inside syringe, improve volume accuracy.
- | Fast forward and backward function used for loading syringe, washing and unlock traffic protection.

SPLab01, SPLab02, SPLab04, SPLab06, SPLab08, SPLab10, SPLab12, SPLab01-G1, SPLab01-G2, SPLab02-G1

Introduction

The syringe pump with infusion/withdrawal mode. **Online flow rate modification function: Can adjust the flow rate during the pump is running.** Stainless steel body, and large-screen chromatic LCD is easy to operate. It can install and fix different types of injectors or syringes in the same time, and it is suitable for transferring micro flow rates with high precision (non-medical).

Rotary Switching Valve

Rotary Switching Valve

Model No.: DKV-03Y
Valve: 3 port non-distribution valve

Model No.: DKV-03F
Valve: 3 port distribution valve

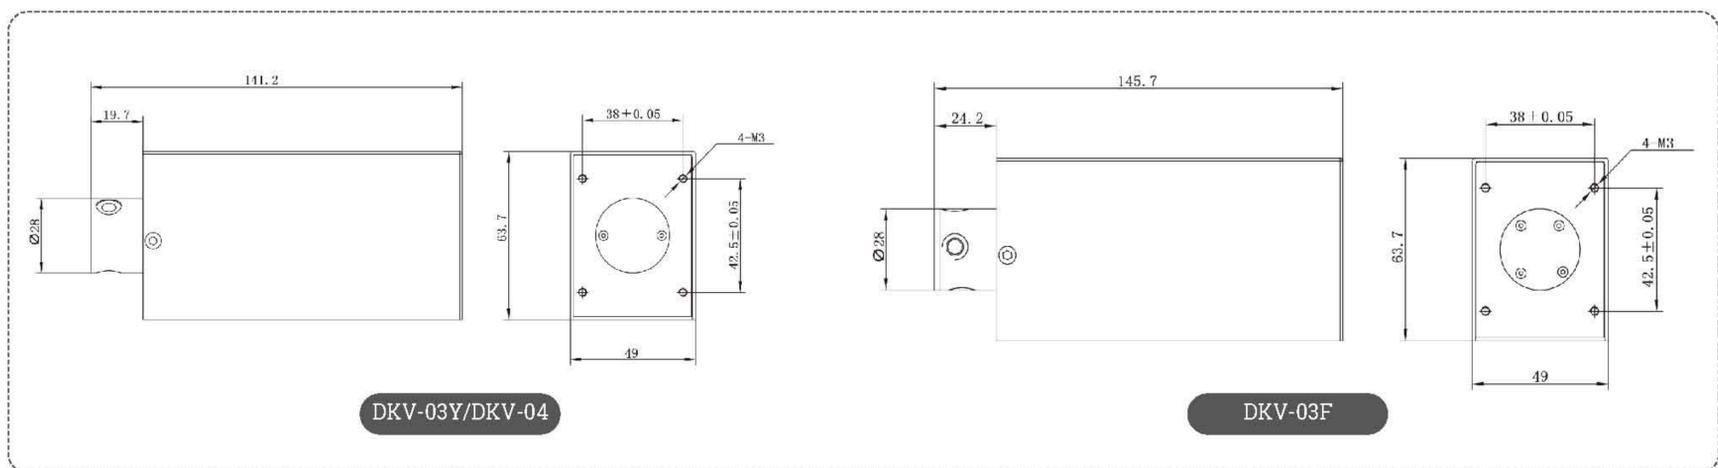

Model No.: DKV-04
Valve: 4 port non-distribution valve

Introduction

The rotatory switching valve is a programmable liquid path unit, support 3 port valve, 4 port valve and 3 port distribution valve. It is controlled by external controller to realize connection between valve body and the ports, controller can check the location of the port at any time.

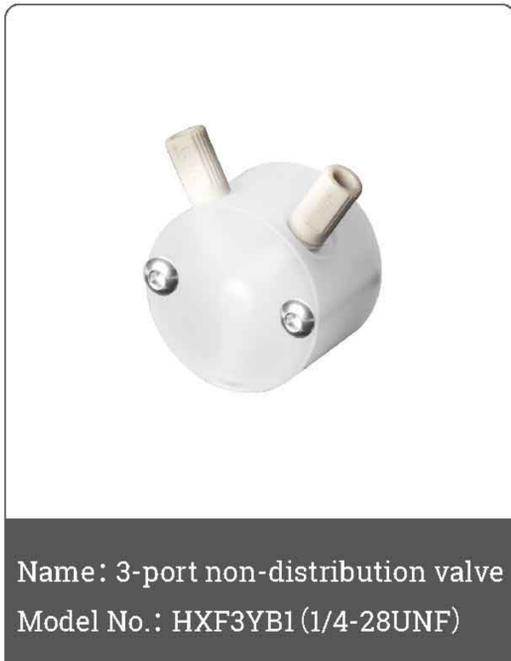

Dimension Drawing (Unit: mm)

Technical Specifications

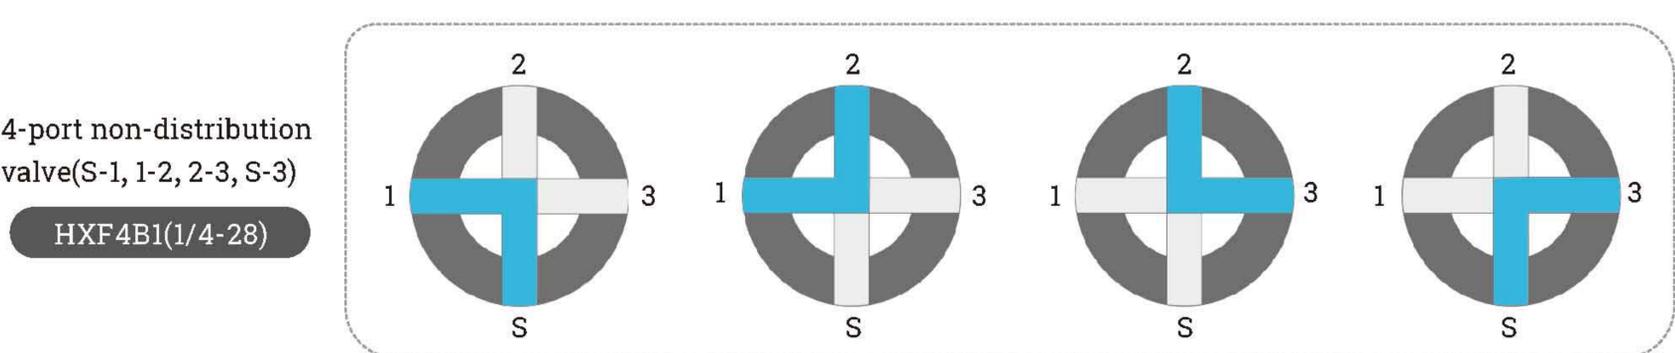

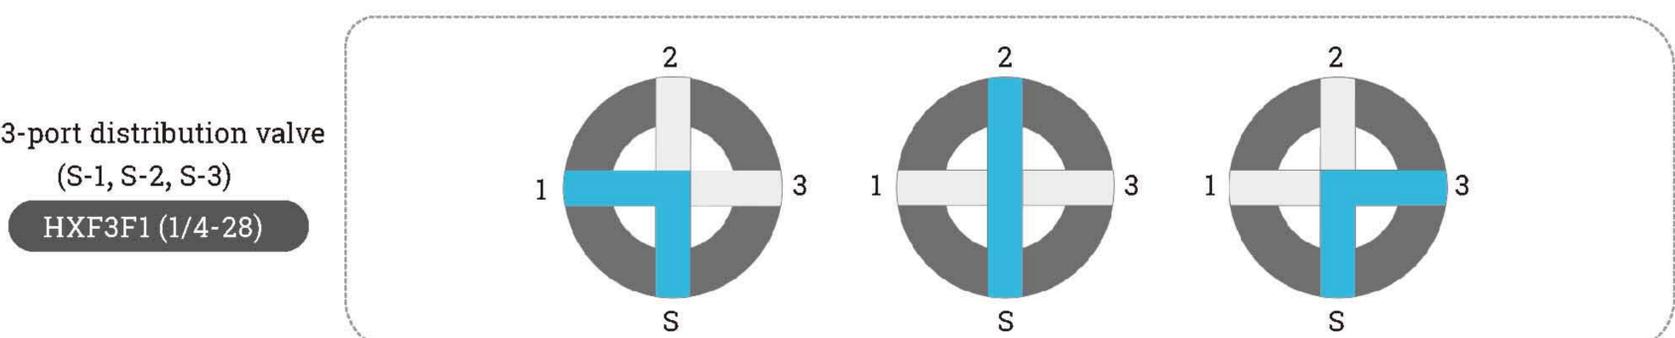

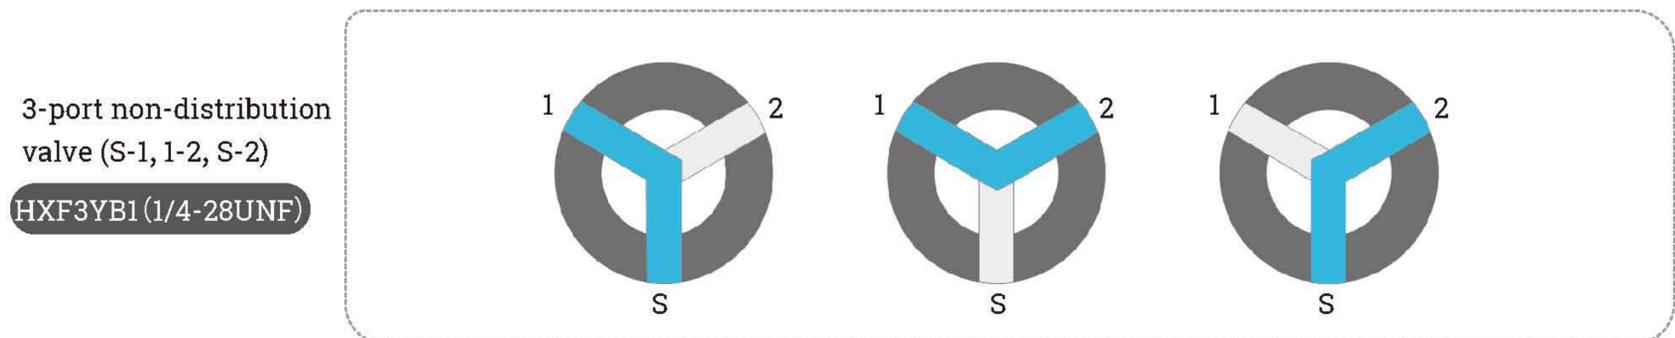

Valve type	3 port non-distribution valve, 4 port non-distribution valve, 3 port distribution valve	Port switching time	≤250ms (Between two adjacent ports)
		Communication	RS485 (standard), RS232/CAN (for option)
Path diameter	1.4mm	Address setting	BCD dip switch set up the address, can set maximum 15 addresses
Valve material	Valve body: PCTFE; Valve element: PTFE	Baud rate (bps)	9600 or 38400 (RS485/RS232) 100K, 125K, 250K, 500K, 1M (CAN)
Maximum pressure	0.68MPa(High pressure above 0.68MPa, please contact us)	Power supply	DC24V/1.25A
Condition temperature	15°C~40°C	Drive Dimension(mm)	121.5 x 49 x 63.7
Connection	1/4-28UNF	Weight	625g

Valve

Technical Specifications

Connection	1/4-28 UNF	Material	PTFE, PCTFE
Path diameter	1.4mm	Working temperature	15°C~40°C
Maximum pressure	0.68MPa(High pressure above 0.68MPa, please contact us)	Storage temperature	-20°C~65°C
Media compatibility	Compatible with most reagents (PTFE, PCTFE compatible media)	Compatible Industrial Syringe Pump Model No.	SP60-1A, SP30-1A, ASD60, ASD60- II, ASD60-III

Accessories

Technical Specifications

Syringe size	1ml, 2.5ml, 5ml, 10ml, 25ml	Liquid temperature	0°C~40°C
Stroke	60mm	Lifetime	2,000,000 times
Plunger rod, barrel material	Zirconia	Max. pressure	0.68MPa
Liquid path material	Zirconia, PTFE	Suitable	SP60-1A, SP60-nB, ASD60 Series, CFSP- I ,CFSP- II

Industrial Syringe Pump Chemical Compatibility

Appendix-Chemical Resistance Chart

This information provided in the below table is to be used only as a guideline. Before permanent installation, test the equipment with the chemicals under the specific conditions of your application.

Ratings of chemical behavior listed in this chart apply to a 48 hours exposure period; we do not have knowledge of possible effects beyond this period.

Warning:

Failure to test chemicals used in individual applications with pump may result in damage to the pump and/or test results.

Danger:

Variations in chemical behavior during handling due to factors such as temperature, pressure and concentration can cause equipment to fail, even though it passed an initial test. Serious injury may result. Use suitable guards and personal protection when handling chemicals.

The table below lists the 4 plastic materials used in industrial syringe pumps:

Rotary valve	
Valve element	PTFE
Valve body	PCTFE
Rotary valve(surface seal)	
Rotor	UHMWPE
Stator	PPS

Ratings - Chemical Effect

A = Excellent

B = Good, minor effect, slight corrosion or discoloration.

C = Fair, moderate effect, not recommended for continuous use. Softening, loss of strength or swelling may occur.

D = Severe effect, not recommended for any use.

N/A = Information not available.

Notes

1. Satisfactory to 22°C (72°F)
2. Satisfactory to 48°C (120°F)
